Company Overview:

XDOBS.COM,LLC. (eXtensible Diversified Optimized Business Solutions) is a company that specializes in optimizing Companies or offices that have large amounts of moving paperwork that require several hours of data entry.

We also have a tracking system that works in conjunction with cell phones and GPS satellites to confirm where people, trucks, and delivery vehicles are at most any given time.

We currently work with County assessor offices in entering appraiser data and drawings into their Mass appraisal system. We also track the FBI, DEA, CIA, and other security and law enforcement individuals.

For further information we suggest visiting our web site at the following URL: www.xdobs.com

Key Management and Technical Staff:

1. Joesph Ellsworth: Specializes in writing and developing software, capable of writing in various computer languages – basic, java, c sharp, windows ce, c plus plus, and various other formats.

Joe has vast experience in management. He has worked for Hewellett-Packard and has managed over one hundred people in technical environments. He has developed several programs and projects while in this position.

Joe has also worked at NASA, and has worked in the technology field the majority of his career.

2. Lyndon Walpole: Specializes in marketing and promoting products and works with companies that would like exposure to government agencies. Lyndon has also developed presentations to attract interest in products in harsh environments and has had great success in developing presentations for several companies.

3. Jim Pemberton: Specializes in basic technical support and network environments. He has set up several intranet and internet communication platforms for several companies.
